

# Power-Glide Lift-Table Carts

**Large Power-Glide Lift Cart**  
Electric Drive and Scissor Lift

**Small Electric Drive and Lift**

**Medium Electric Double Scissor Lift**

**Medium Electric Drive w/ Pedal Lift**

**GRUNT** *Power-Glide* Electric Lift Table Carts are versatile battery operated, ergonomically designed carts, which feature the *Power-Glide* drive system and *Intuitive Directional Controls*. Some carts have load capacities up to 1,500 pounds. **Productivity starts with a GRUNT.**

To help create an exertion free environment, **GRUNT** *Power-Glide* Lift Table Carts are adaptable to many different uses. **GRUNT** *Power-Glide* Lift Table Carts are available in three standard deck sizes. The larger deck measures 29" wide by 63" long with an adjustable deck height between 19" and 59" using an electric motor driven single scissor lift. The medium deck size measures 24" wide by 43" long available with an electric double scissor (deck height adjustable from 16" to 63") or a manual pedal scissor lift (with an adjustable height from 18" to 35").. The small deck measures 24" wide by 40" long with an electric single scissor lift and an adjustable deck height from 18" to 35".

The **GRUNT** *Power-Glide* drive system consists of a maintenance free transaxle driven by a powerful 24-volt motor with maintenance free batteries, solid-state electronics and an automatic smart charging system which makes the **GRUNT** *Power-Glide* Lift Table Cart a durable and worry free solution to your material handling and transport needs. **Don't underestimate the power of a GRUNT.**
