

# CARTMOVER™

## The battery-powered mover that safely pushes or pulls most all loads on wheels

### NOTHING BEATS THE SAFETY AND CONVENIENCE OF THE **CARTMOVER™**

The *CartMover™* from Appleton Manufacturing is specifically designed to safely move virtually any heavy container on wheels – such as product carts, mobile material racks, dumpsters, even stalled tow motors – all without the need for additional machinery or the risk of personal injury.

The *CartMover™* is so portable and convenient, your employees will never again be tempted to physically endanger themselves pushing or pulling these heavy loads. This ergonomically-designed, battery-powered mover is cordless for tangle-free operation. It's also powerful – strong enough to move loads in excess of 20,000 pounds with ease!

### SIMPLE TO USE, EASY TO MANEUVER

The *CartMover™* is so well designed, any employee can operate it with confidence within the first two minutes of use.

Tip the *CartMover™* back on his rear wheels to roll it quickly into position. Convenient controls near the handle provide easy access to all basic functions, including “lower” and “raise” for the load cradle, and “forward” and “reverse” for moving the load. The *CartMover™*'s handle features a rugged, rubber-covered, non-slip grip. Simply turn the handle like a throttle to move the load at variable speed.

### IF IT'S ON WHEELS — THE **CARTMOVER™** CAN MOVE IT EASILY AND SAFELY.

- product carts
- trash dumpsters
- roll off waste containers
- shipping carts
- tow motors
- product racks
- raw material racks
- golf carts
- tool boxes
- fastener pick racks
- core carts
- laundry bins
- linen carts
- hospital beds

## WE BUILT THE **CARTMOVER™** TO PERFORM ... AND TO LAST.

Top to bottom, end to end, the *CartMover™* is built tough. From its high-density non-skid wheels, to the rugged steel frame, to its powerful gear motor drive, this tool is engineered to thrive in any environment, from machine shops and foundries, to warehouses and hospitals.

*CartMover*'s quick-change battery packs can be replaced in just 10 seconds — without tools of any kind.

The quick charging battery docking station cools batteries while they charge to extend battery life.

Rugged steel frame and body to withstand most any work environment.

Powerful and durable geared motor drive provides the “**push and pull**” where you need it, for as long as you need it.

Fixed height model with spring loaded hitch pin for quick placement and positive positioning.

Versatile lift mechanism for positive engagement of load allowing for variable cart frame heights and uneven floors.

Programmable speed control provides profiled forward and reverse motion to fit your application.

## WE ENGINEERED THE **CARTMOVER™** TO KEEP WORKERS SAFE.

We believe people like to be productive on the job. That's why so many injuries occur every year as workers try to move heavy loads by themselves. They either thought the load would roll on its existing wheels ... or they simply were not patient enough to wait for a lift or tow motor. Now the *CartMover™* can change all that.

The *CartMover™* is a heavy-duty tool, but light enough to be easily maneuvered by any one. There are no electric cords or pneumatic hoses to trip on or become entangled. Our innovative battery-powered design provides the mobility needed to increase worker productivity while enhancing safe work practices.

- ergonomically designed from end to end
- portable and convenient
- no hoses/wires to tangle or trip over
- encourages employee use
- helps prevent injuries
- frees up tow motors and lift equipment
- automatic stop upon release of handle
- travel speeds slow enough to be safe, fast enough to improve productivity

## PUT APPLETON TO WORK FOR YOU TODAY

The new *CartMover™* is available only from the innovators at Appleton Mfg. Division. Contact a Customer Representative today and ask about our **Demo Program**. Call **800-531-2002** or **920-751-1555**. Or visit us online at [www.appletonmfg.com](http://www.appletonmfg.com).
