Pusher Mounted to Probe

The **Electric Powered Assist Device** provides for powered movement of loads onto and/or off of probes, platforms, “V” Blocks and other load support devices.

The best of both worlds—electric powered assist for ease of load manipulation along with ergonomically designed lifters. Designs are available for load handling as follows:

- ◆ Rolls
- ◆ Cartons
- ◆ Trays
- ◆ Totes
- ◆ Electronic Devices
- ◆ Etc

Safely and efficiently handle heavy or awkward shaped loads on/off of the end-effector
