

## Easier, and More Stable

With the Morse **Clamp+Go**™ you have greater control, and significantly reduce risk of tipping with the weight evenly distributed across the four dolly wheels. Apply 35 Lb. of pulling force using the **Clamp+Go**™, and a 500 Lb. drum will move from 0 to 3 mph in 5 seconds.

## More Difficult, and Less Safe

Pushing the top of the drum with the same horizontal force will result in a 73% load shift to the front wheels of the dolly. The dolly can become difficult to control and potentially hazardous - even tip over, especially if the dolly wheels hit an obstruction, a hole in the floor, or you descend a slope.
